

Computer Team Meeting

4/28/22

Attendees: Melissa Pappas, Youa Thao, Gary Laskowski, Andrew Ward, Michelle Newell, Terry Hogan, Keri Levin, Diane Anastos, Aado Perandi, Derrick Malone

PHA updates

Derek is working n getting out to all the sites. So far he has been to Cleveland and Mt. Airy. A reminder was given that Computer Admins get their stipends on the RC meeting date. Be sure to turn in your work log then.

Computer rep updates

Seal's computers are working fine. The big issue is still people leaving messes in the computer area.

Cleveland's computers are working fine. Derrick has visited this site and seen the computers recently.

There are still issues at multiple sites with people turning the computers off after they are finished using them. Signs should be posted about this. They don't always work though. (If people ignore them.)

Hamline's computers are working fine now. Melissa was out there recently and checked and updated them. Hamline's computer chairs got thrown out by a resident recently.

Montreal has computers with the update issue. Keri needs the Office 2016 license key since he wants to reinstall Windows on those computers. Melissa will send him the license key and link to the Dropbox folder with software.

Whether there should be steps for installs was discussed. It seems that following the software list and other agreed upon procedures like using certain desktop backgrounds and not changing passwords are the important things.

Downloading the full installer for Deepfreeze was suggested. There have been issues using the installer stub that downloads programs as it installs.

Wabasha has no problems. They have a new toner cartridge and the printer is working well now.

Ravoux has no problems except the blue "improve your experience" box popping up occasionally. You should be able to go to settings and notifications and uncheck a box to stop that.

Next Meeting: May 26th by Zoom
