

Preparing a Highly Skilled Workforce

through
HAP Academy OIC!

As part of HAP and HAP Academy OIC's commitment to empower our clients and help uplift them to be financially independent, we offer a customized job skills training program. We serve both adults (**25 and over**) and youth (**16-24**) with credential-based programming across the age groups, designed to teach skills that lead to livable wage careers in high-demand industries.

By enrolling in one of our five training tracks, clients get hands-on training and apprenticeship experience from experts, and even potential college credits and certification through our partnerships with local colleges. Our classes are specially designed to be culturally sensitive. Upon completion, our employment services staff assist clients with job placements in positions that offer a significantly higher salary and ladder for advancement.
